

## Windows installation guide

1. DB browser for SQLite – Download [page](#)
  - a. Download the Standard installer for 64-bit Windows

### Windows

Our latest release (3.12.2) for Windows:

- DB Browser for SQLite – Standard installer for 32-bit Windows
  - DB Browser for SQLite – .zip (no installer) for 32-bit Windows
  - DB Browser for SQLite – Standard installer for 64-bit Windows
  - DB Browser for SQLite – .zip (no installer) for 64-bit Windows
- b. The installation is similar to installing any new software on your computer. There is not a lot of options to select. You will be asked to agree to the “End User License Agreement” and be asked if you want to include a shortcut to the Desktop and/or Program Menu. It’s up to you if you want to include a shortcut; I only selected the Program Menu option.
  - c. After you successfully installed DB Browser, the application will look something like the screenshot below

## Mac installation guide

### 1. DB Browser for SQLite

- You can install using the download link in the Downloads [page](#), or install using Homebrew (if you use this software). Then just drag the DB Browser icon into your Applications folder.

macOS

Our latest release (3.12.2) for macOS:

- DB Browser for SQLite

Homebrew

If you prefer using Homebrew for macOS, our latest release can be installed via Homebrew Cask:

```
brew install --cask db-browser-for-sqlite
```

- After you successfully installed DB Browser, the application will look something like the screenshot below
